

PRODUCT BENEFITS

- Speed of application, by roller or spray is far quicker than traditional tapes and plastics therefore creating **large labour savings**.
- One part water based liquid requiring no mixers, hardeners or catalyst and ready to use from the bucket.
- Environmentally friendly and non-toxic water based product.
- UV stable, waterproof and able to withstand the elements for several months.
- Resistant to most construction chemicals and cement.
- On removal, **PROTECTAPEEL** will leave the surface cleaner than it was prior to application, substantially reducing costs in cleaning materials as well as time.
- As there is no adhesive present in **PROTECTAPEEL**, on removal of **PROTECTAPEEL** there will be no residue left on the surface unlike traditional tapes.
- **PROTECTAPEEL** will not become prematurely detached on site as commonly found with other products.
- **PROTECTAPEEL** allows for the acceleration of certain works due to its protective capabilities.
- **PROTECTAPEEL** can be applied over specialist doors while still allowing access during construction.
- Apply over dirty surfaces (dusty, oily, greasy or even damp) without the need for cleaning beforehand.
- **PROTECTAPEEL** can also be applied to all forms of curtain walling and performance glass offering protection previously not possible.
- Upon completion of the application, all brushes, rollers, spray equipment and even applicator's hands can simply be washed with water.

Save time and money with Protectapeel

- **reduced cleaning**
- **accelerated works**
- **avoid unnecessary replacements**

Apply **PROTECTAPEEL** to windows, doors, showers and all performance glass that you wish to protect. Simply peel off when construction is completed.

Produced by Brochure Design (Pty) Ltd 011 782 4684

086 123 PEEL (7335)

PROTECTAPEEL is an easy to apply one part liquid which can be sprayed, brushed or rolled on, in your factory or on-site and dries to form a “skin tight”, protective coating, for use during renovations and the construction of buildings.

PROTECTAPEEL cures to form a contour- hugging waterproof protective layer resistant to construction chemicals and alkaline thus protecting all handles, hinges and hardware

PROTECTAPEEL is used on all glass, aluminium, uPVC and wood including steel windows and door frames.

PROTECTAPEEL can be used on various other items during construction from marble, tiles or wood flooring through to baths, showers, kitchens, sanitaryware and balustrades to name a few.

PROTECTAPEEL is UV stable and will withstand the elements for several months which is peeled off and reveals a pristine surface with no residue.

PROTECTAPEEL CAN BE USED TO PROTECT:

WINDOWS • DOORS • BATH & SHOWER ENCLOSURES

Protect windows and glass during:

- Manufacture, transport and installation
- Plaster and rendering work
- Use as a masking agent during painting
- Protect primed or finished wood and other surfaces.

PROTECTAPEEL applied to shower glass.

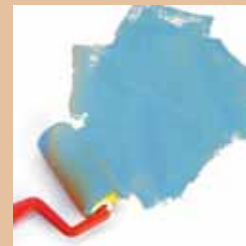

PROTECTAPEEL being easily removed from the glass.

Clean, protected glass revealed.

PROTECTION OF OTHER SURFACES DURING CONSTRUCTION

- **FLOORING:** marble, granite, tiles, real timber and laminated
- **SANITARYWARE:** bath tubs, showers and fixtures
- **KITCHENS:** counters, appliances and built in units
- Polyurethane and varnished surfaces
- Sandstone and slate
- Virtually any surface!

Methods of applying PROTECTAPEEL

Apply by brush:

Reach into those hard to reach areas using a brush or those small engineering components.

Apply by roller:

Protectapeel can be simply applied using a short haired mohair roller and paint tray.

Apply by spray:

For fast effective application in seconds both externally on site or within a factory environment.
